

AI in Everyday Life

Reading Worksheet — Level C |
tahricteaches.com

AI is part of our everyday lives! You might not always notice it, but AI is **designed** to make things easier and faster. From your phone to your school, AI is quietly helping in many different ways every single day.

Do you use a phone or tablet? When you search for a video, AI **recommends** the ones it thinks you will enjoy most. When you take a photo, AI **adjusts** the brightness to make it look better. When you speak to a voice assistant, AI **processes** your words and finds an answer.

AI is also found in many homes. Smart speakers can answer questions and play music. Smart lights can turn on **automatically** without anyone pressing a button. Some homes have AI that **monitors** the temperature and adjusts the heating to keep everyone comfortable.

At school, AI can **personalize** learning. Some apps use AI to find out what you already know. Instead of giving everyone the same lesson, AI **adapts** the questions to match each student's level. This makes learning more focused for every learner.

AI also helps keep people **secure**. Cameras at airports use AI to spot danger. Some cars use AI to watch the road and warn drivers about hazards. In the future, **autonomous** cars may drive themselves — with AI making all the decisions.

A. Vocabulary

- | | |
|------------------------|---|
| 1. designed _____ | a. able to work or move on its own |
| 2. recommends _____ | b. changes to fit a new situation |
| 3. adjusts _____ | c. to make something fit one specific person |
| 4. processes _____ | d. safe and protected from danger |
| 5. automatically _____ | e. happening on its own without a person doing it |
| 6. monitors _____ | f. made for a specific purpose |
| 7. personalize _____ | g. suggests something it thinks you will like |
| 8. adapts _____ | h. makes small changes to improve something |
| 9. secure _____ | i. works through information to find an answer |
| 10. autonomous _____ | j. watches something closely over time |

B. True or False

1. AI is only used in schools, not at home. ____
2. AI can help find the best song or video for you. ____
3. AI in cameras can make photos look better. ____
4. Smart speakers like Alexa use AI. ____
5. AI cannot help with spelling mistakes. ____
6. Some learning apps use AI to find what students need to practice. ____
7. AI in cars can help watch the road. ____
8. AI might be able to drive cars by itself in the future. ____
9. AI makes many parts of everyday life easier. ____

C. Fill in the Blanks

Word Bank: designed, recommends, automatically, monitors, adapts

1. AI is _____ to make things easier and more useful.
2. When you search for a video, AI _____ the best ones for you.
3. Smart lights can turn on _____ without anyone pressing a button.
4. A smart home device _____ the temperature to keep everyone comfortable.
5. Learning apps use AI to _____ questions to match each student's level.

D. Comprehension Questions

1. Name two ways AI helps you on a phone or tablet.
2. What can smart speakers do?
3. How does AI help students at school?
4. How can AI keep drivers safe?
5. When do we use AI in everyday life?

E. Discussion Questions

1. What is one AI tool you use at home or school?
2. Would you like a car that drives itself? Why or why not?
3. Can you think of a new way AI could help in your life?

Answer Key

AI in Everyday Life — Teacher Reference Only

A. Vocabulary: 1-f, 2-g, 3-h, 4-i, 5-e, 6-j, 7-c, 8-b, 9-d, 10-a

B. True/False: 1-F, 2-T, 3-T, 4-T, 5-F, 6-T, 7-T, 8-T, 9-T

C. Fill Blanks: 1-designed, 2-recommends, 3-automatically, 4-monitors, 5-adapts

D. Comprehension:

1. Find the best song/video, fix spelling, improve photos (any two)
2. Answer questions and play music
3. AI finds what you are good at and gives questions at your level
4. AI watches the road and can help prevent accidents
5. All day — from phones to homes to schools to cars
