

Forest Conservation - Saving Our Green World

Reading Worksheet — Level C | tahricteaches.com

Forests are **home** to many animals and birds. They are very important for our **earth**. Trees give us **clean** air to breathe. They also give us wood and paper. Many animals **live** in the forest and need trees to survive.

Forests **help** fight climate change. Trees take bad gas from the air and make it clean. They also make our world more beautiful and **green**. Forests give us fresh water and keep the soil healthy.

People sometimes **cut** down too many trees. This hurts the animals that live there. When we cut trees, we need to **plant** new ones. This helps the forest **grow** back strong and healthy.

We can **save** our forests in many ways. We can use less paper and recycle more. We can plant new **trees** in our yards and schools. Every tree makes a difference for our planet.

Forest conservation means taking care of forests for the future. Kids can help by learning about **nature** and telling others why forests are important. Together, we can keep our forests alive and **clean** for many years to come.

A. Vocabulary

- | | |
|------------------|---|
| 1. home _____ | a. to make things better |
