

Recycling - Turning Trash Into Treasure

Reading Worksheet — Level C |
tahricteaches.com

Every day, people **throw** away many things. Old **paper**, **glass** bottles, and plastic bags fill up bins on the street. All this trash is a big **problem** for our **earth**. If we do not take care of it, where does it all go?

Most trash goes to a big open area of land called a dump. The dump gets bigger and bigger each year. Trash left on the ground can make the air smell bad and look ugly. It can also make nearby water **dirty** and hurt the animals that live there.

Recycling means using old things to make new things again. We can **clean** old glass bottles and turn them into new ones. Old paper can become fresh new paper. Even old oil from cooking can be collected and used again. Recycling helps us **save** what we already have.

Many schools now teach kids how to recycle the right way. Students put paper in one box and bottles in another. Some classes even start a small **garden** using food scraps from their lunch. It is easy and fun to help the earth every day.

Everyone can make a difference no matter how young or old. You can pick up trash at the park on weekends. You can bring your own bag to the store when you shop. Small actions by many people can keep our **nature** clean and beautiful for many years to come.

A. Vocabulary

- | | |
|------------------|--|
| 1. throw _____ | a. a hard, clear material you can see through |
| 2. paper _____ | b. free from dirt or marks; neat and tidy |
